

- The user will need to download VoiceMeeter (<https://vb-audio.com/Voicemeeter/>)
Voicemeeter 1.0.8.1 (EXE file)
 Install Voicemeeter on your Windows PC.

- Your VoiceMeeter should look like the picture below.

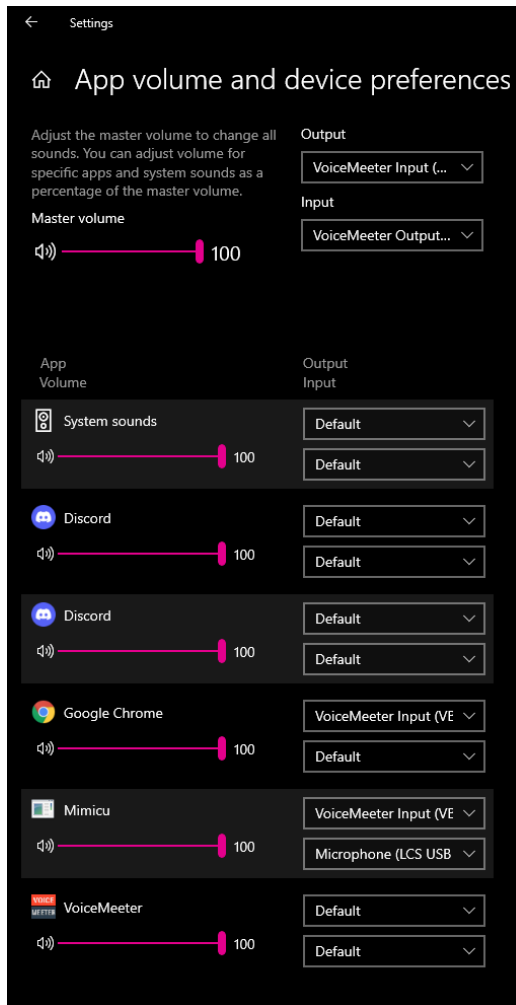

- Then you will need to head to your sound settings and put this “VoiceMeeter input” and “VoiceMeeter output” as your default playback and recordings.

- Before we go forward we will need to run Mimicu first.

- Next, we'll need to go to “app volume and device preferences” and have everything the same that is shown in the picture below.

-
- Lastly your discord “Voice & Video” input and output devices should be the same in the picture below
